

SUPPLEMENTARY PRODUCTS FOR ADHESIVES

Take advantage of technicoll®'s benefits like high quality raw materials, innovative formulations, technical know-how and excellent technical advice.

BONDING – MORE THAN A CONNECTION

technicoll® – a registered trademark of RUDERER KLEBTECHNIK GMBH – represents reliable bondings for more than 50 years. In this sophisticated market we focus on continuity and sustainability and simultaneously grow constantly. Our success is based on the use of high quality raw materials in the production process. Specific product modifications by our development engineers lead to premium-products and innovations that are highly appreciated by customers in manufacturing industry, in handcraft and in the distribution market. Combining technical know-how with individual advice is an essential competitive advantage of technicoll®.

Important notice:
The information about our products is the result of thoroughly conducted examinations. The information's purpose is to help you with your bonding works to the best of our knowledge. We do not accept liability for the results, or damages of any kind in the respective cases of application, since they are beyond our control due to multiple possibilities (material types, material combinations and working methods). Thus, please conduct your own tests and trials. Only the consistently high quality of our products within the given approval parameter can be guaranteed.

SUPPLEMENTARY PRODUCTS FOR ADHESIVES

Crosslinking agents / hardeners	Base	Product characteristics / special characteristics	Suitable materials / special characteristics	Shelf life	Packaging**
technicoll® 8355	isocyanate	crosslinking agent for technicoll® 8044 and technicoll® 8053	-	1 year	40 g bottle 1.15 kg canister
technicoll® 8302	isocyanate	crosslinking agent for technicoll® 8301	-	1 year	1.1 kg canister

Cleaning sprays

technicoll® 9901	solvent	metal cleaning spray	metals / ceramics / glass / elastomers / solvent sensitive substrates	3 years	500 ml spray
technicoll® 9902	solvent	plastics cleaning spray	plastics / painted, coated surfaces / sensitive substrates	3 years	500 ml spray

Solvents / cleaning agents

technicoll® 8362	ethylacetate	dilution of adhesives based on PUR / cleaning agent for plastics / also suitable in order to clean tools	plastics / painted, coated surfaces	3 years	900 g canister 4.5 kg canister 27 kg canister
technicoll® 8363	solvent	dilution of adhesives based on SBR / cleaning agent for plastics / also suitable in order to clean tools	plastics / painted, coated surfaces / solvent sensitive substrates	3 years	675 g canister 3.5 kg canister 20 kg canister
technicoll® 8367	solvent	dilution of adhesives based on SBS, CR and caoutchouk / cleaning agent for plastics / also suitable in order to clean tools	plastics / painted, coated surfaces	3 years	750 g canister 4 kg canister 22 kg canister 150 kg barrel
technicoll® 9920	acetone	dilution of synthetic resin adhesives and synthetic resin solvents / cleaning agent for metals / also suitable in order to clean tools (former trade name technicoll® 8368)	metals	3 years	800 ml canister
technicoll® 9602	solvent	cleaning agent and remover for technicoll®-cyanoacrylate	-	1 year	20 g PE-bottle

Primer / activator

technicoll® 9601	solvent	activator for technicoll®-cyanoacrylate		1 year	200 ml spray
technicoll® 9605-1	solvent	primer for technicoll®-cyanoacrylate for bonding PE, PP, POM, TPE	-	1 year	10 ml bottle

Cartridge applicator gun / application tools

Cartridge applicator gun for 310 ml cartridges	1-component cartridge applicator gun for 310 ml norm- and coaxial-cartridges	also suitable for high viscous adhesives	-	-
Cartridge applicator gun technicoll® 50	multi-cartridge applicator gun for 50 ml technicoll®-cartridges with mixing ratio 1:1, 2:1, 10:1	with changeable push rods	-	-
Cartridge applicator gun technicoll® 200	multi-cartridge applicator gun for 200 ml technicoll®-cartridges with mixing ratio 1:1, 2:1	-	-	-
Cartridge applicator gun technicoll® 400	multi-cartridge applicator gun for 400 ml technicoll®-cartridges with mixing ratio 1:1, 2:1	-	-	-
Hot-melt adhesive gun technicoll® 9310	hot-melt adhesive gun	-	-	-

Abbreviations: CR: polychloroprene rubber, PE: polyethylene, POM: polyoxymethylene, PP: polypropylene, PUR: polyurethane, SBS: styrene butadiene styrene, SBR: styrene butadiene rubber, TPE: thermoplastic elastomer

**available at the time going to press, occasionally further packaging available
